## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-17 are in the form of a method claim. However, no specific steps for allocating communication codes are recited. Without such recognizable steps, a method the claim attempts to define is not understood. Furthermore, the claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors, adding to the difficulty to the understanding of the claimed invention. For instance, claim 1 recites “a comparison between the send/receive parameters” but what two element that are supposed to be compared with each other is not understood. The last limitation in claim 18 is not understood at all, which recites “means of reception, from the station controller, of a command for allocating to a channel a code determined by the station controller as a function of *some at least of the said* information transmitted, relating to the send/receiver parameters.” The emphasized portion of the claim is not standard English and thus is not quite understood as to its meaning.

The claims will be examined as best understood, as set forth below.

### ***Claim Rejections - 35 USC § 102***

Art Unit: 2611

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1,10, 11,18 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Walton (2003/0013451).

Walton discloses a method of allocating codes in a cell to terminals where mutually orthogonal codes are assigned, wherein a non-orthogonal code is assigned to a terminal based on parameters defining the antenna pattern. See paragraph [0205], [0012], [0028].

***Allowable Subject Matter***

5. Claims 2-9,12-17,21-33 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
